Bhawna

SOFTWARE DEVELOPER

EDUCATION

B.TECH CSE (2019-2023)

Chandigarh Engineering College, Punjab
CGPA: 8.2

12th (2019)

Shiv Vani MSS School, Delhi
82%

10th (2017)

Shiv Vani MSS School, Delhi
CGPA: 9.8

SKILLS

C++
Data Structures
HTML
CSS
Javascript
Node JS
Express JS
Mongo DB
Bootstrap
Linux
Java

PROJECTS

Hirehub

- Developed a job posting site where the admin will post jobs and the user can take tests if the user meets the specified criteria to apply for the job.
- User authentication** was implemented using **Node JS**, **Express JS** and **Passport JS** so that only a valid user can apply for the job.
- Passport JS was connected to **MongoDB** to store user data.
- Used **CRUD** operations such as Create, Update, Delete to perform interactive user actions.
- Used **Bootstrap** to make the UI user-friendly.

To-Do List

- Created a to-do list in Javascript.
- User can add the to-do's for the day and delete them.

SUMMARY

Software developer with internship experience in backend and frontend. I have a good knowledge of C++ programming and problem solving using data structures. I am familiar with java. Bright critical thinker with proven talent for learning quickly in result oriented environment. I learn things at a fast pace and I am open to learning new technologies.

EXPERIENCE

Nokia, Bangalore

Aug 2022-Present

Student Intern

- Created 5G interfaces like N7, N32C etc in java
- Did xml testing by using a nokia internal testing tool
- Did testing for the 5G interfaces using bash.
- Worked with several other developers to resolve bugs and debugged issues in 5G interfaces
- Gained knowledge about 5G architecture and it's working.
- Learnt about REST API and it's implementation during the course of internship.

Amazon, Gurugram

Software Developer Intern

May 2022-July 2022

- Create Java models and accessor for the project.
- Created APIs using springboot framework
- Created the UI for the website using react.
- Documented the integration of the backend and frontend of the website using private integration using API gateway.
- Used JUnit to do the unit testing for the APIs.
- Worked with developers to identify and remove software bugs.
- Prepared and submitted reports and other documentation to assist development team members.

ACHIEVEMENTS

- Cleared Amazon WOW.
- Solved more than 450 problems on platforms such as leetcode and GFG.
