Monika Bhute

- A **Python Developer** with **2+ Years** of Experience in **Python, Flask** and **Web Technologies** and **MySQL**.
- Proficiency in Python Scripting and **Core Python** Expertise.
- Good Extensive Experience in **Developing/Handling** highly interactive **Web based** Applications specially using **Python, Flask, API's**.
- Familiar with **Object Relational Mapper (ORM)** libraries.
- Committed, goal oriented, adaptive to learn new things and technologies.
- Possess good problem solving & Interpersonal skills, having capability to work alone.
- Basic understanding of **Front-End Technologies**, such as **HTML, CSS** and **Server-Side languages**.
- Having Strong knowledge in **OOPS** Concept and **Python**.
- Familiarity with **MySQL** databases and their declarative query languages.
- Proficient understanding of code **Versioning Tools** such as **Git**.
- Ability to handle multiple tasks and work as in a team Members.

SKILLS:

- Platforms : Windows, Linux
- Languages : Python, Core Java
- IDE's : PyCharm, VS Code
- Tools : JIRA, GitHub ,Postman, Confluence
- Web Services : REST
- Web Technologies : HTML, CSS
- Web Framework : Flask
- Version Control System : GIT
- RDBMS/Database : MySQL
- Data Transfer Technology : XML, JSON

EXPERIENCE:

Jan 2021– Mar 2023

Software Engineer / Incedo Inc, Pune

Worked as **Python Developer** with **Incedo Inc** Pune from **Jan 2021** to **March 2023**.

CERTIFICATIONS:

- **AWS Certified Cloud Practitioner** by AWS
- **SAFe5 Practitioner** by Scaled Agile
- **Python Certification** by Simplilearn

EDUCATION:

B.E in Information Technology / KDK College of Engineering, Nagpur

Completed Bachelor's of Engineering in **2020**.

PROJECT PROFILE

Project 2:

Project : Project and Resources Management Tool

Technologies : Python, Flask, MySQL

Role : Python Developer

Description:

The project is developed for managing projects and resources bandwidth data along with KPI Calculations. To maintain records of projects status, resources availability, skillset management, new user management and KPI data. Keep track of all data related to projects and resources.

Roles and Responsibilities:

- Developed the application using Flask Framework, which includes Python code.
- Written backend efficient codes and logic using python.
- MySQL was the primary database for data storage.
- Developed RESTful APIs to communicate with frontend ensuring seamless communication.
- Utilized libraries such as NumPy and Pandas for data manipulation.
- Postman tool to test and verify the API's functionality ensuring they are reliable and accurate.
- Understanding the process and interacting with front end team.
- Worked on Defects and Bugs.
- Experience working in Agile environments, employing Scrum, Agile or Kanban Frameworks.
- Modifications in python code to make new enhancements or resolve problems, as per client requirements.

Project 1:

Project : Multiple Projects

Technologies : Python, MySQL, AWS

Role : Python Developer

Description:

As a Python Backend Developer worked on couple of projects like to write scripts for managing a portal for handling data of new employees and automating the scripts for manual tasks using AWS.

Roles and Responsibilities:

- Understanding the project requirements and developing/enhancing the code based on the client requirements using Python.
- Involved in creating modules and models using Python required for the project.
- Developed python script to automate the manual task of taking data from AWS manipulating it and loading again on AWS using S3 buckets.
- Involved in accessing data from database as demanded for a task.
- Coordinating with the team to meet the client requirement.
- Installed & Configured MySQL database Connections.

Personal Profile:

- Date of Birth : 29 June 1998
- Languages Known : English, Hindi, Marathi
- Permanent Address : Nagpur, Maharashtra
- Sex : Female
- Marital Status : Single
- Nationality : India
