🚀 Projects

Aiqahealth App

It's a doctor on call app and app where patient can consult the doctor according to their selected disease and a specialised doctor is assigned to the patient . Consultant can be both audio and video and a prescription is generated where doctor provides medicines , exercises etc to be taken and there adherence is taken in to account.

Roles and responsibilities:-

Developing backend components for both web and mobile application on aiqahealth patient app/doctor app.
Doctor web with major feature of audio and video consultation using webrtc (agora) and django's websockets using django channels.
Automatic rescheduling of consultation at certain time using celery.

Finncub

Finncub :- It's a fintech project made with the sole purpose of making loan disbursement,kyc and other feature much easier.
Role and responsibilities:-
My role in this project is handling the reporting service which is mainly handling the big data using python libraries like pandas and creating differnt kind of reports in excel,pdf and csv of that big data using both synchronous and asynchtonous mehods.

Kreditserve
